INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/CN02/00081

I. Basis of the report

1. With regard to the elements of the international application:

the international application as originally filed
 the description:

pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____

the claims:

pages _____, as originally filed
 pages _____, as amended (together with any statement) under Article 19
 pages _____, filed with the demand
 pages _____, filed with the letter of _____

the description:

pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____

the sequence listing part of the description:

pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____

2. with regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
 the language of publication of the international application (under Rule 48.3(b)).
 the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

contained in the international application in written form.
 filed together with the international application in computer readable form.
 furnished subsequently to this Authority in written form.
 furnished subsequently to this Authority in computer readable form.
 The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
 The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

the description, pages _____
 the claims No. _____
 the drawings, sheets/fig. _____

5. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/CN02/00081**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement:**

Novelty (N)	Claims 1—7	YES
	Claims _____	NO
Inventive step (IS)	Claims 1—7	YES
	Claims _____	NO
Industrial applicability (IA)	Claims 1—7	YES
	Claims _____	NO

2. Citations and explanations (Rule 70.7)

This invention discloses a direct amplifying station and positioning method for mobile station. The direct amplifying station according to the present invention is adding following items to the downlink electrical circuits of present direct amplifying station: synchronous search unit for searching the synchronized signal of the base station, delay unit for producing fixed time delay of frame start time of cell identifier signal and fixed time delay of frame start time of base station pilot signal, and cell identifier generation mode for generating cell identifier symbol. The method for mobile station positioning is as follow: determining the mobile stations in the coverage area of the direct amplifying station based on the coherence of fixed time delay and time difference between base station pilot signal and cell identifier, then determining the distance from the mobile station to the direct amplifying station using TOA function. However these characters was not suggested in documents listed in international search report, so the claims in present application certainly involved novelty, inventive steps and industrial applicability.
